

TYPE FIVE:

If the products you have purchased are one of these three products, pls refer to the installation procedures as follows.

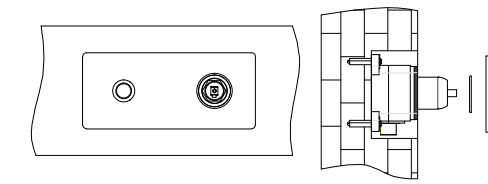

1. Dig a oblong hole and 4 mini holes, size according to upon pic show. Knock 4pcs screws into mini holes.

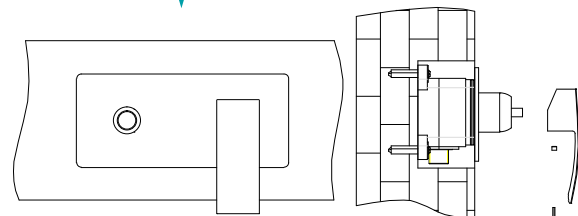

2. Put faucet-body into the embedded box hole , use gaske-t and 4pcs screws to make it in a fix, then connect the waterpipe properly in case of leakage.

3. Use some objects to cover the gaps around, th-en remove the protective cover with a screwdriver.

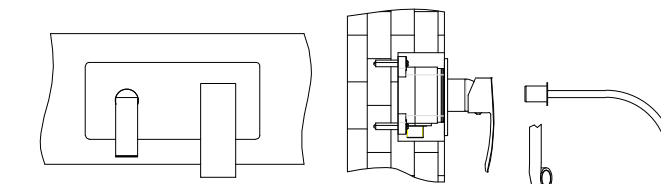

-5-

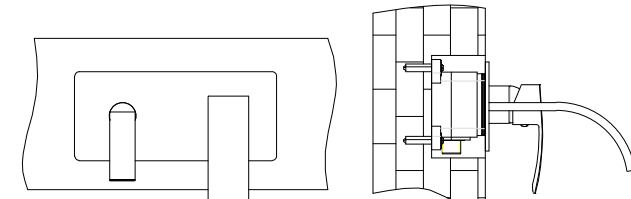

4. Put the o-ring into the plate, and insert this plate to faucet body.

5. Put on the handle, and fix it with screw , then put on red/blue button (red on the left, blue on the right)

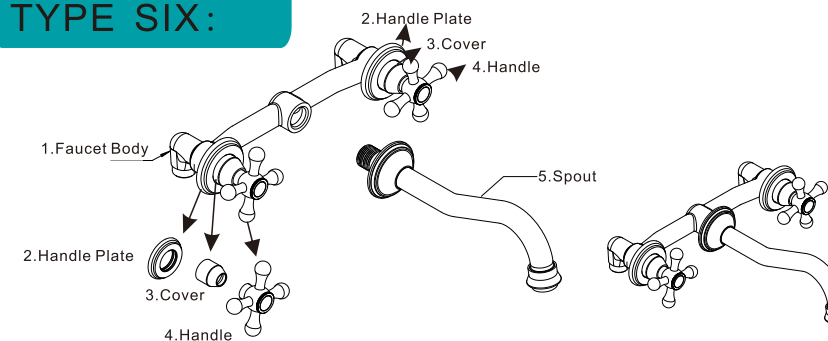

6. Seal the end of spout with the sealing tape, and spin it into the faucet-body.

7. Installation completed. Open the handle and check whether the function is good.

-6-

TYPE SIX:

Note: No need to disassemble 2,3,4 parts before fixing it, and make sure there is no silt in water pipes.

1. Revolve handle plate(2) near to handle (4) side, Keep a little distance for installation.

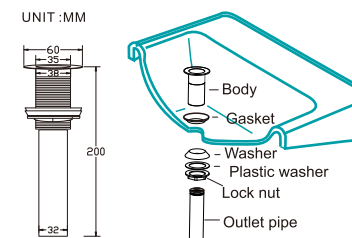

2. Put faucet body (1) into wall. The water inlet is downward which is connected with water pipes. (it will be better to protect faucet surface by wrapping up with PE bag)

3. Make sure water come out without leaking, fill the wall and revolve handle plate(2) near to wall

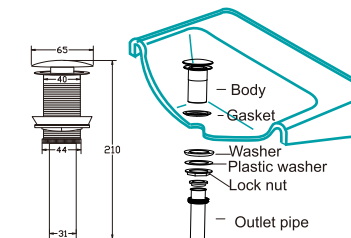

4. Install spout to faucet body, sealed well by sealing tape, finally make sure nozzle is vertical downward

Push pop-up

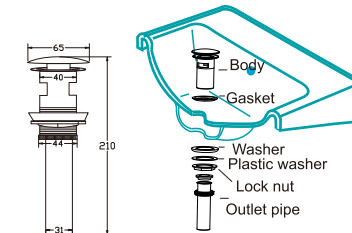

1. Without overflow

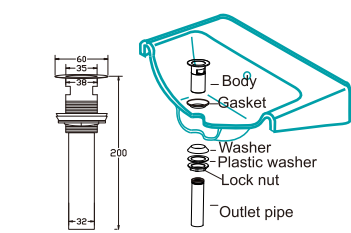

2. Without overflow

3. With overflow

4. With overflow
