

SKU: Cab-PC-07956

Quick Start for TUYA Wi-Fi Power Strip Setup:

1. Download TUYA SMART app from the App Store or Google Play .

2. Connect mobile device to your 2.4GHz Wi-Fi network. Please note this Smart Power Strip can only be connected via a 2.4GHz network.

3. Launch TUYA SMART and follow the in-app instructions to connect the Smart Power Strip to your network.

a. Login to TUYA SMART

b. Click Add Device

c. Set rapid blink, click Confirm

d. Enter Wi-Fi password

e. Connecting device

f. Edit Name, Share or Done

g. Device Home Screen

h. ON/OFF Control

After you have successfully set up the TUYA SMART app and your device(s) you may control them remotely from your mobile device using a Wi-Fi or Cellular connection. Compatible with Alexa Echo and Google Home.

Wi-Fi Smart Power Strip w/Surge Protection:

LITESUN App Reference Guide:

Register / Create an Account

Tap "Register" to create an account using your email address or mobile phone number. Optionally you may tap Sign in with SMS to create a temporary account using your mobile phone number.

- ☑ Tap Register to enter registration page.
- ☑ The system automatically recognizes your Region (country/code). You may also follow the instructions to manually select your country code. Enter your email address or mobile number (do not include dashes or spaces) and tap Login.
- ☑ If you enter your mobile number, you will get a verification code via text message. Enter the verification code, create a password, and tap "Confirm" to finish your registration.
- ☑ If you enter your email, create a password and tap "Confirm" to finish your registration.

Login / Registered Account

- Tap “Login” to sign in to your account.
- Enter your previously registered email address or mobile number and password, and then tap “Login”.

Login / Temporary Account / Sign in with SMS

- Tap “Sign in with SMS” if you want to create a temporarily login. Note: there is no password and your login account will not be saved.
- Enter your mobile number (no dashes or spaces) and tap “Get”. You will receive a verification code via text message.
- Enter the verification code and tap “Login”.

Forgot Password

- To reset Password, Tap “Forgot password”.
- Enter you email address or mobile number and tap “Next”.
- Enter the verification code received via text or email, then enter a new password, tap "Confirm" to finish.

Add Device +

Normal Mode

- Enter the App, tap “+” Add Device in the center bottom of the page to enter device connection page.
- There are two Wi-Fi network connection methods (Normal Mode and AP Mode.) Normal Mode is the default and connects via your 2.4GHz Wi-Fi channel only. (Does not work with 5GHz channel.) Normal mode allows you to connect several TUYA SMART devices at the same time.
- For Normal Mode, please make sure the indicator light on the plug is set to flashing rapidly (2 times per second).
- Press the Wi-Fi power button and hold for 5 seconds until
- indicator light starts rapid flashing.
- Tap “Confirm indicator rapidly blink”.
- Enter your 2.4GHz Wi-Fi password and tap “Confirm” to enter the device connection process.
- Device Connection Process will begin and connect device.
- Tap Done.

AP Mode (Access Point)

- Tap “AP Mode” in upper right screen.
- Connect your phone to 2.4GHz Wi-Fi.
- In AP Mode your device broadcasts a device name in your phone’s Wi-Fi Settings that allows the Wi-Fi device to connect to your network. AP mode allows you to connect devices one by one.
- Make sure the device’s indicator light is slowly flashing (1 time every 3 seconds). Press and hold Wi-Fi power button for 8-10 seconds to set indicator light to fast flashing. Press and hold again until indicator light slowly flashes.
- Tap “Confirm indicator slowly blink”.
- Enter your 2.4GHz Wi-Fi password and tap “Confirm”.
- Open Wi-Fi Settings to connect to Device’s Access Point Wi-Fi name.
- Locate then Tap the Wi-Fi device name, i.e. SmartLife_XXXX.
- Tap Connect.

- Go back to TUYA SMART app.
- Device Connection Process will begin and connect device.
- Tap Done.

Network Connection Process

The App goes through the process of trying to Connect Device, and displays a percentage on the Connecting Now screen while connecting. When the percentage reaches 100% the device should be successfully connected and registered to the cloud. The device default name will appear on the screen. You may rename the device by tapping the pencil icon to edit. This allows you to change to a better description of the power strip. Tap “Done” or “Share with Family” to finish setup.

Troubleshooting Adding Device Failed

If your App interface failed to connect your power strip to your phone/tablet, it means that the network connection failed. Make sure you are connected to a 2.4GHz Wi-Fi channel. Try connecting again or view help in the app.

Controlling Devices

After successfully configuration, the connected devices will be displayed on the home screen. Tap the device name to enter its control page. Access to the control buttons is located in the upper right corner of the screen “...” in addition to the 4 Switch controls and Timer on main screen.

Note: When device is offline or no longer connected, “Offline” will appear under the device name. Tap “+ Add Device” and follow the on-screen instructions to re-connect the device.

Device Control Center Features

- **Switch:** Switch the 4 outlets on and off remotely using Wi-Fi or Cellular connection.
- **Timer:** Set on and off schedules for each switch. On and off schedules must be set up individually. Make sure to set an off schedule for every on schedule.

Device Settings / ...

To control your devices Tap “...” in upper right corner of device control screen.

- **Modify Device Name>** Set a custom name for your device.
- **Device Sharing>** Tap “Add” to share the device with family members; they must have registered TUYA SMART app login name.
- **Device Info>** Displays your Device ID, IP address and Mac Address.
- **Create Group>** Create a group to control multiple devices simultaneously. A list of available devices to group will be displayed. Only identical devices with same model number may be grouped.
- **Use Echo>** Follow the on-screen instructions for how to set up voice control of your device with the Alexa app using Amazon Echo to control a device.
- **Send Feedback>** Send feedback to the manufacturer.
- **Check for Firmware Update>** Display the latest version.
- **Remove Device>** Remove the device from the app. Note: this won’t delete the customized device information; previously connected device information is stored.
- **Restore Manufacturer Defaults>** Delete the stored device information completely.

Profile

Tap "Profile" located at bottom of home screen.

Tap to set your name> Below are options available for set up:

Add Profile Picture, Nickname, Phone Number, Account location, Change Login Password, Pattern Unlock, Logout

Device Sharing> Users sharing your device.

Message Center> Messages related to the app.

Use Echo> Display list of supported devices and set up instructions for Amazon Echo.

FAQ> Tap to view list of frequently asked questions

Feedback> Display feedback messages sent or send new feedback message.

About> Current app version. Rate Us: submit rating and/or review.

Settings> Turn on/off Sound, Vibrate, and Push Notifications, Clear Cache.

CAUTION:

Do not install this device if there is not at least 30 feet (10 meters) or more of wire between the electrical outlet and the electrical service panel. This device features an internal protection that will disconnect the surge protective component but will maintain power to the load – now unprotected. If this situation is undesirable for the application, follow the manufacturer's instructions for replacing the device.

Warnings

Plug directly into a standard grounding 15A wall receptacle (DO NOT plug into an extension cord or wall tap.) Unit is not intended for use with 20A or GFCI wall receptacles.

Risk of Electric Shock

DO NOT use in wet or damp locations

Keep children away from Wi-Fi power strip, outlets and cords

For Indoor use only

Fully Insert Plug

Risk of Fire

DO NOT exceed recommended electrical ratings

DO NOT use with extension cords

DO NOT remove ground pin (middle pin)

DO NOT use with precision timing devices where inaccurate timing could be dangerous

DO NOT use with devices that should not be operated unattended (heaters, burners, etc.)

This product is designed to limit damage to electronic devices from electrical surges of less than 900 joules. Consult the manufacturer of devices plugged into this product and/or a licensed electrician to confirm appropriate protection levels.

ALL CHARGING ESSENTIALS PRODUCTS MUST BE INSTALLED AND USED IN ACCORDANCE WITH THEIR INSTRUCTIONS, INCLUDING INSTRUCTIONS PROVIDED WITH THE CHARGING ESSENTIALS PRODUCT PACKAGING OR PROVIDED ON THE PRODUCT ITSELF. CHARGING ESSENTIAL SURGE SUPPRESSION PRODUCTS WILL NOT PREVENT DAMAGE FROM ALL SURGES, AND SPECIFICALLY ARE NOT DESIGNED OR WARRANTED TO PROTECT AGAINST LIGHTNING STRIKES. CHARGING ESSENTIAL SURGE SUPPRESSION PRODUCTS MUST BE INSTALLED ON A PROPERLY GROUNDED OUTLET WITH A CIRCUIT BREAKER APPROPRIATE FOR ELECTRONIC PRODUCTS, TYPICALLY 15 AMPS.

AT THE DISCRETION OF CHARGING ESSENTIALS ANY DEFECTIVE PRODUCT WILL BE REPLACED OR THE PURCHASE PRICE REFUNDED. THIS WARRANTY SHALL IN NO EVENT EXCEED AMOUNTS PAID BY CUSTOMER TO CHARGING ESSENTIALS OR ITS AFFILIATES FOR THE CHARGING ESSENTIAL PRODUCTS INVOLVED, AND EXPRESSLY EXCLUDES COVERAGE OF ANY DAMAGE TO THIRD PARTY PRODUCTS OR ELECTRONICS.

Specifications

Maximum Input Voltage (VAC)	125 VAC
Nominal Input Frequency (Hz)	60Hz
Maximum Output Power (Watts)	1875W
Maximum Line Current (Amps)	15A
Cord Type	ETL/CETL SJT-B 14AWG/3C 60°C or SJT14AWG/3C 60°C
USB Output	5V $\pm$ 0.25V, 2.1A Max ($\pm$ 5%)
Joules	245J,490J,735J,980J Max
VPR	900V (L-N), Type 3 SPD
Indoor	Indoor Only
Network Requirements	Wireless router supporting 2.4 GHz wireless band Remote Control Devices through 3G, 4G or Wi-Fi
Smart Device Compatibility	Android smartphone/tablet running Android 4.1 or above iPhone/iPad running iOS 8 or above TUYA SMART App 1.0.1 or higher
Certifications	ETL & CETL Listed, FCC
Standards	Conforms to UL1363, UL1449, UL1310, UL817, UL62, UL1077, UL1054 Certified to CSA STD C22.2 NO 42 AND E60730-1 CONFORMS TO UL STD. 1363 and 1449 CERTIFIED TO CSA STD.C22.2 NO.308 & 8

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
